

THE RAGE ON THE ROAD

HOW TO RECOGNIZE AND AVOID AGGRESSIVE DRIVERS

WHO ARE THEY?

Here's what we know of them, so far:

These high risk drivers climb into the anonymity of an automobile and **take out their frustrations** on anybody at any time.

For them, frustration levels are high, and level of **concern for fellow motorists is low**.

They run stop signs and red lights, speed, **tailgate**, weave in and out of traffic, pass on the right, make **improper and unsafe lane changes**, make hand and facial gestures, scream, honk, **and flash their lights**.

They drive at speeds far in excess of the norm which causes them to: follow too closely, change lanes frequently and abruptly without notice (**no signals!**), pass on the shoulder or unpaved portions of the roadway, and **leer** at and/or **threaten** – verbally or through gestures – motorists who are thoughtless enough to be in front of them.

WHEN CONFRONTED BY AGGRESSIVE DRIVERS:

First and foremost make every attempt to **get out of their way**.

Put your pride in the back seat!
Do not challenge them by speeding up or attempting to hold-your-own in your travel lane.

Wear your seat belt. It will hold you in your seat and behind the wheel in case you need to make an abrupt driving maneuver and it will protect you in a crash.

Avoid eye contact.

Ignore gestures and refuse to return them.

Report aggressive drivers to the appropriate authorities by providing a vehicle description, license number, location, and, if possible, direction of travel.

RACING UP A MERGING LANE

If you have a "Cell" phone, and can do so safely call 911 and they will direct your phone call where it needs to go.

If an aggressive driver is involved in a crash farther down the road, stop a safe distance from the crash scene, wait for the police to arrive, and report the driving behavior that you witnessed.

FOLLOWING TOO CLOSE

Always avoid the challenges or confrontations of an aggressive driver and support law efforts to rid the streets and highways of this menace.
